The purpose of this presentation is to showcase my portfolio and explain why I structured it this way

What is certainly noticeable at first glance is the font used, which is very reminiscent of the arcade videogames of the late 90s, early 2000s, years in which I grew up, being born in 1997

The name of the font is "PRESS START 2P" downloaded from google font

This is me

My name is Lidano Fiorini, I'm an Italian guy from the city of Latina located in central Italy. I attended and graduated from a technical institute in the specialization "electronics and telecommunications". I got to know the world of digital jobs since I started the first year of my studies, I was passionate about making simple web pages with HTML which made me discover a new world

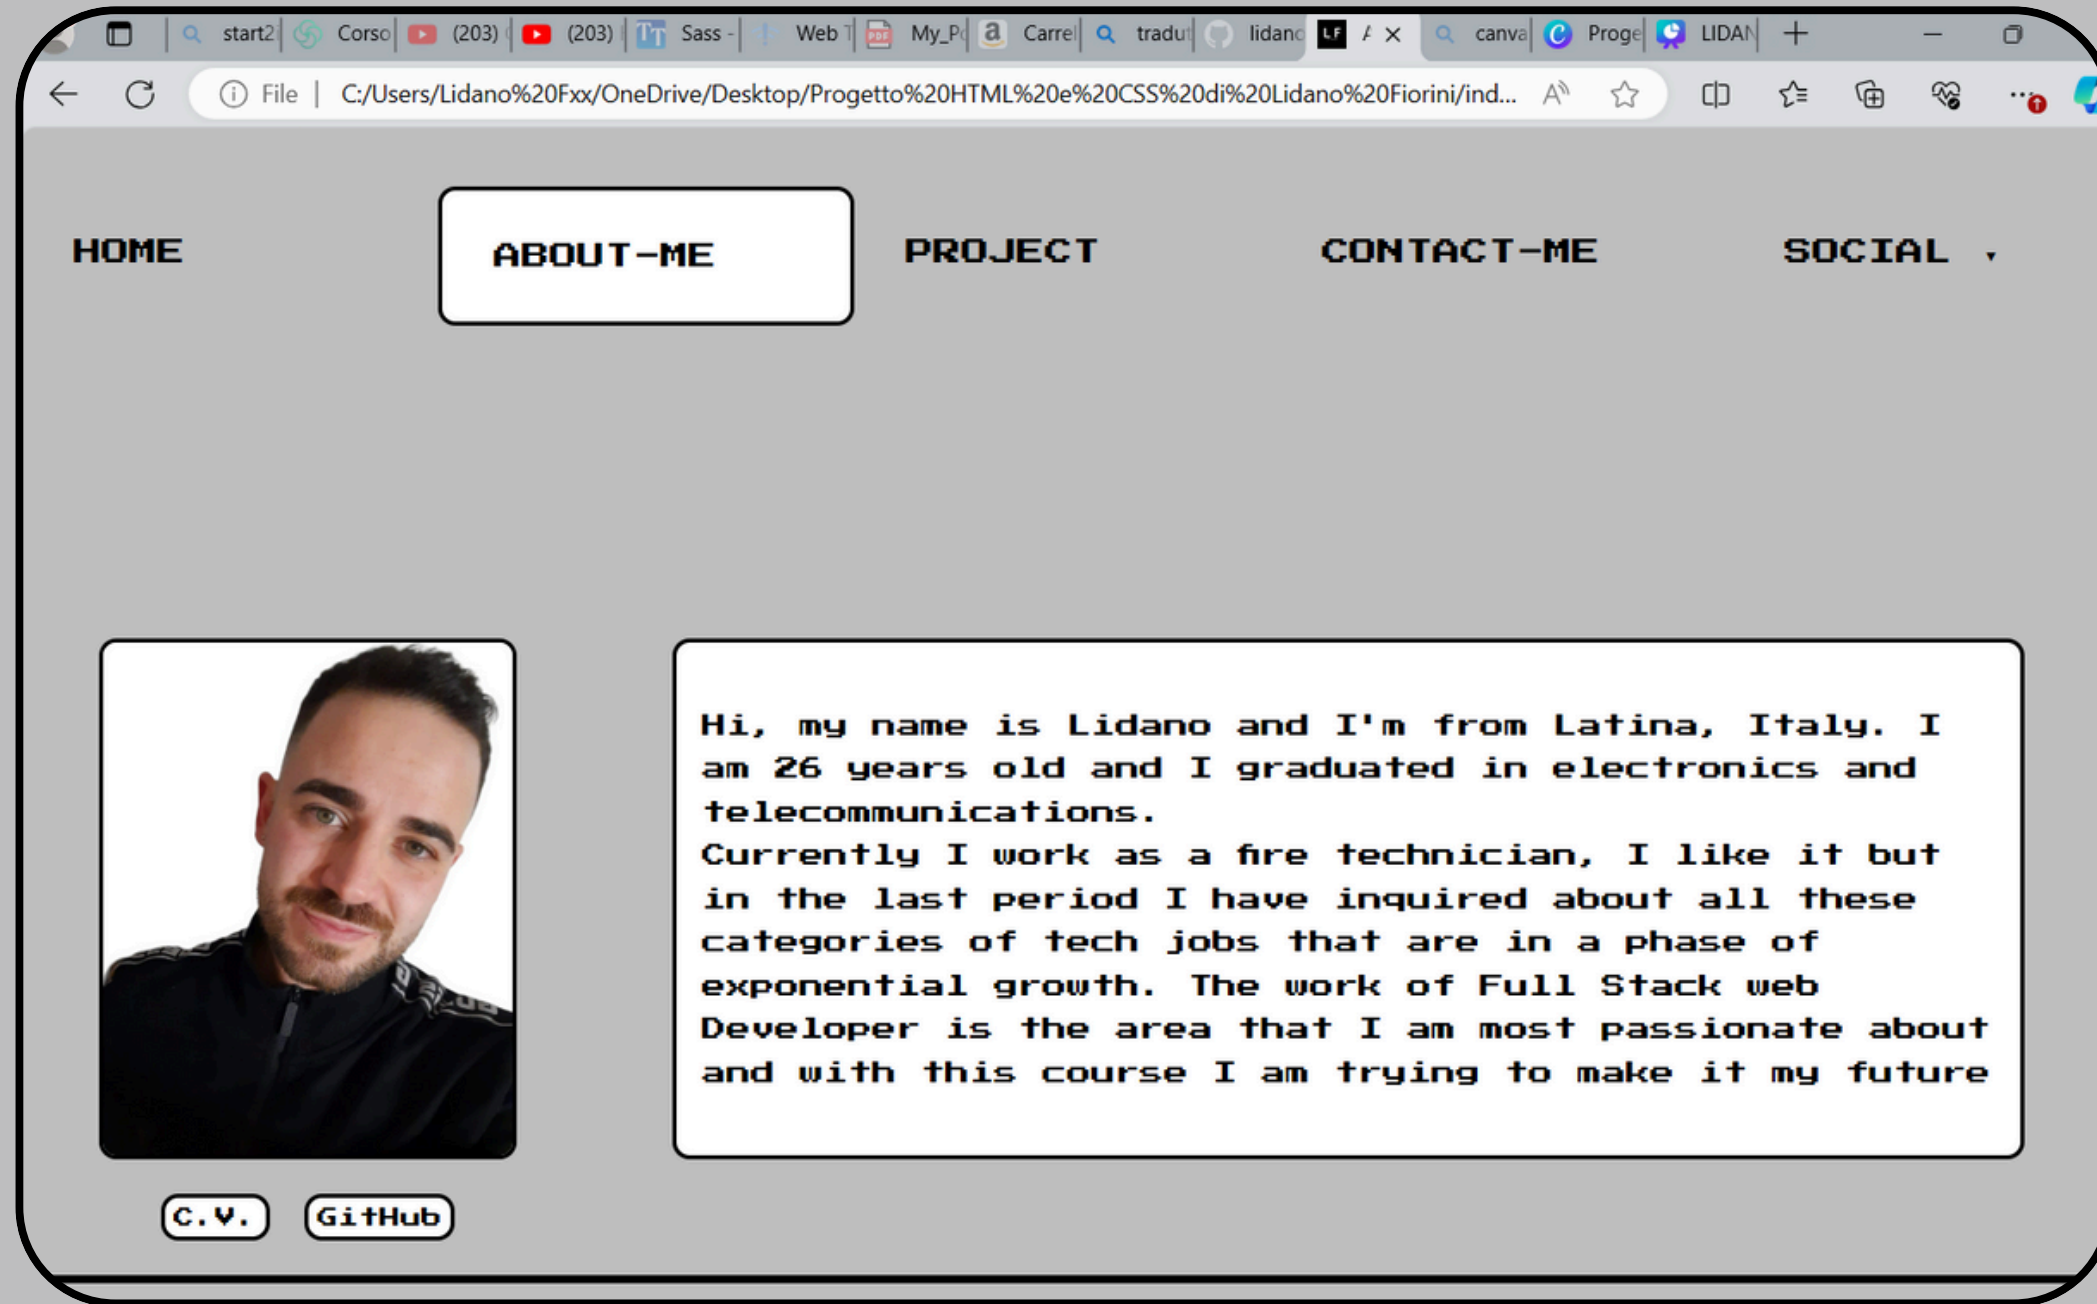

PLAN

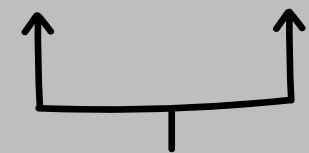

I structured my portfolio so that it was easy to use and intuitive, for example this is the home page.

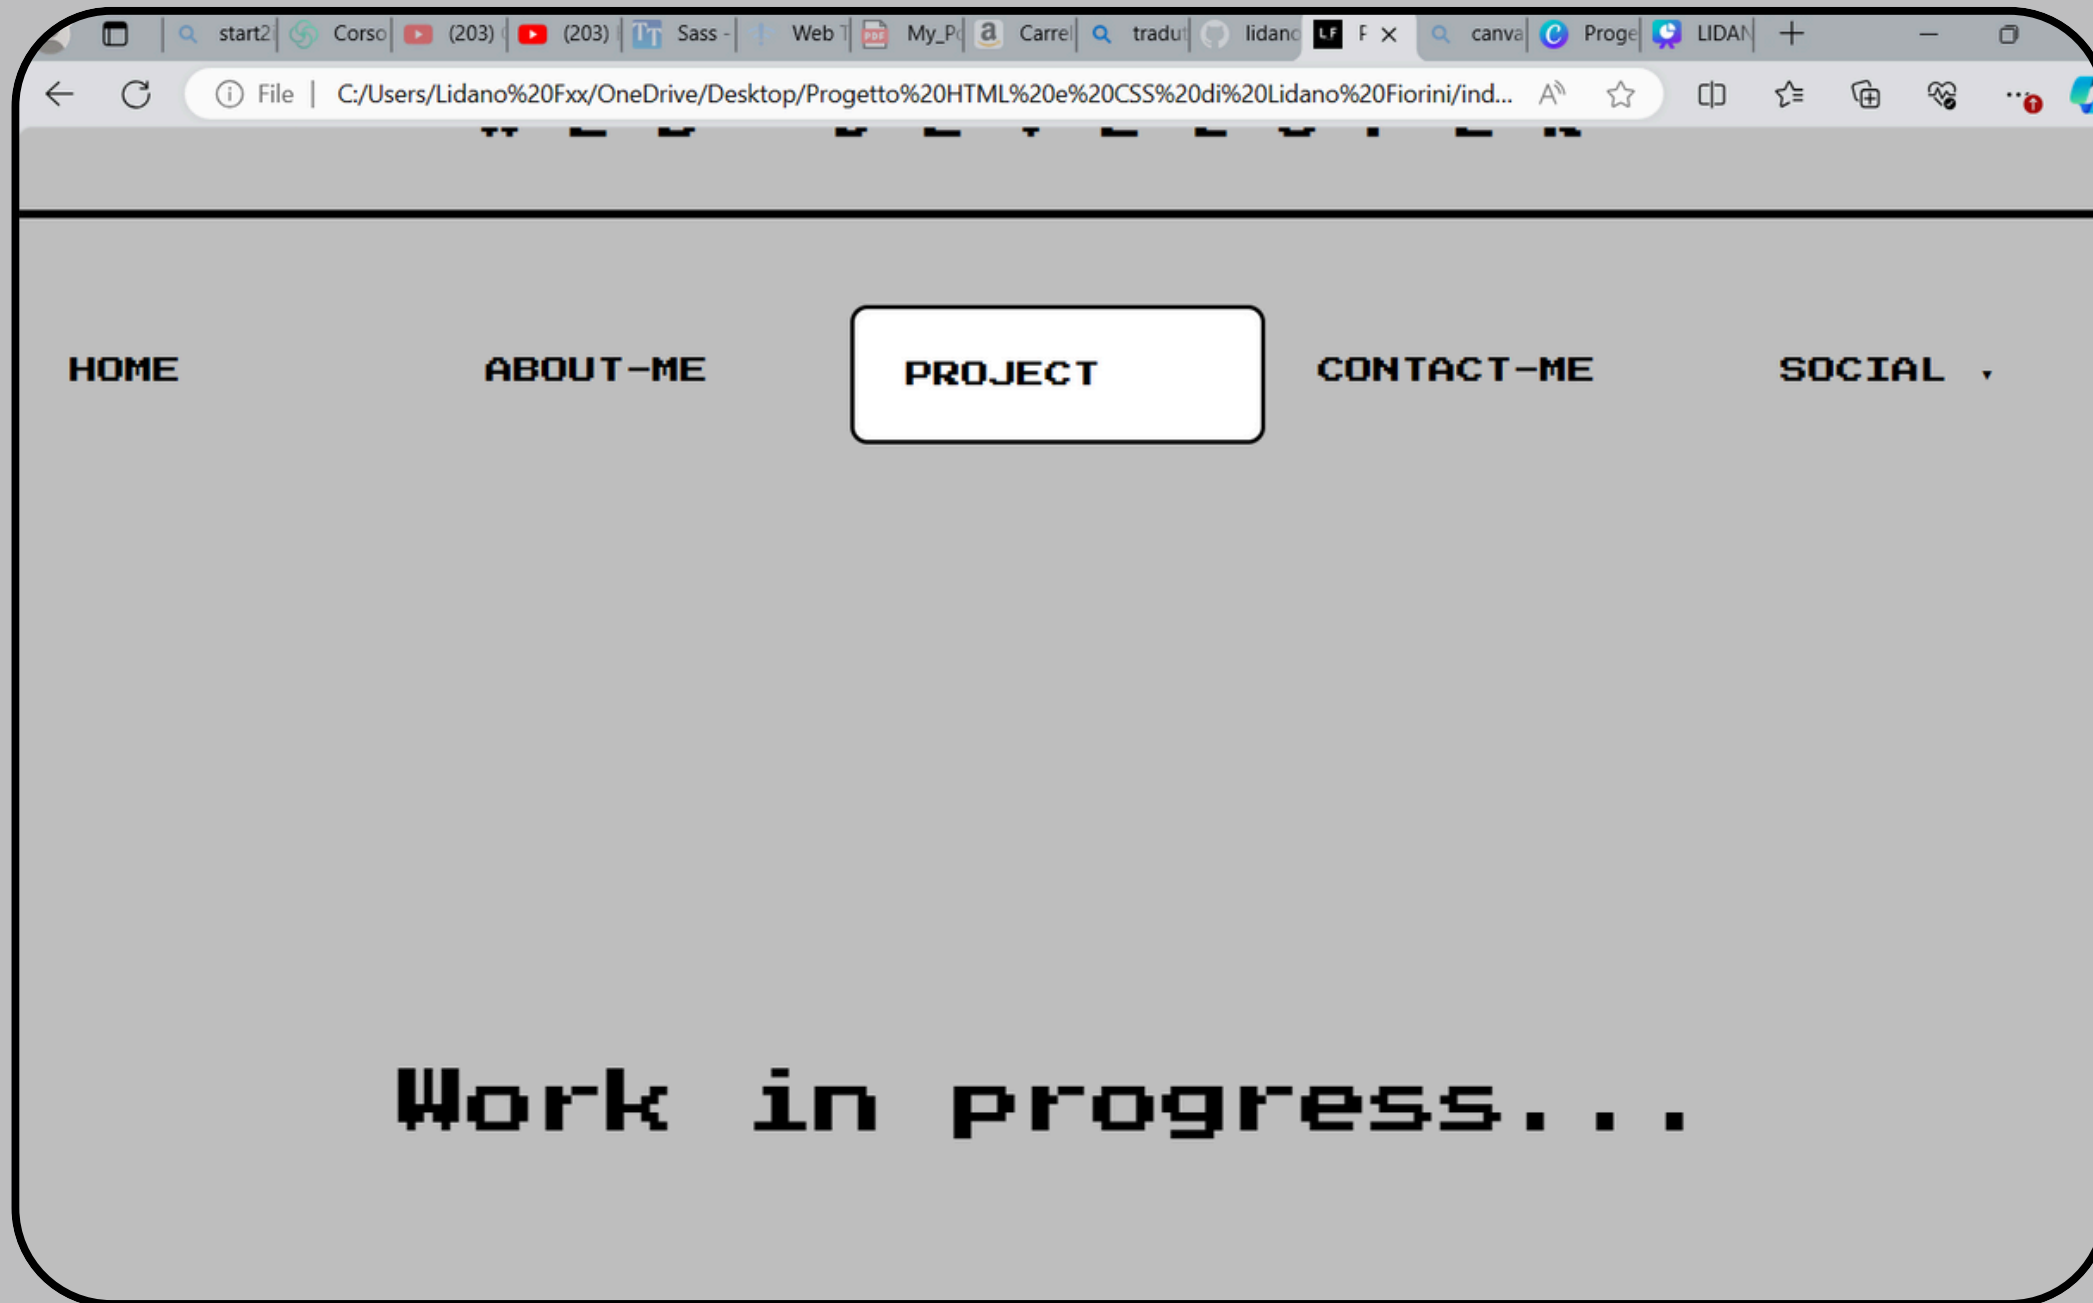

I divided the portfolio into 4 different screens, home, about-me, project and contact-me. Each one is identified by the white background and the black border

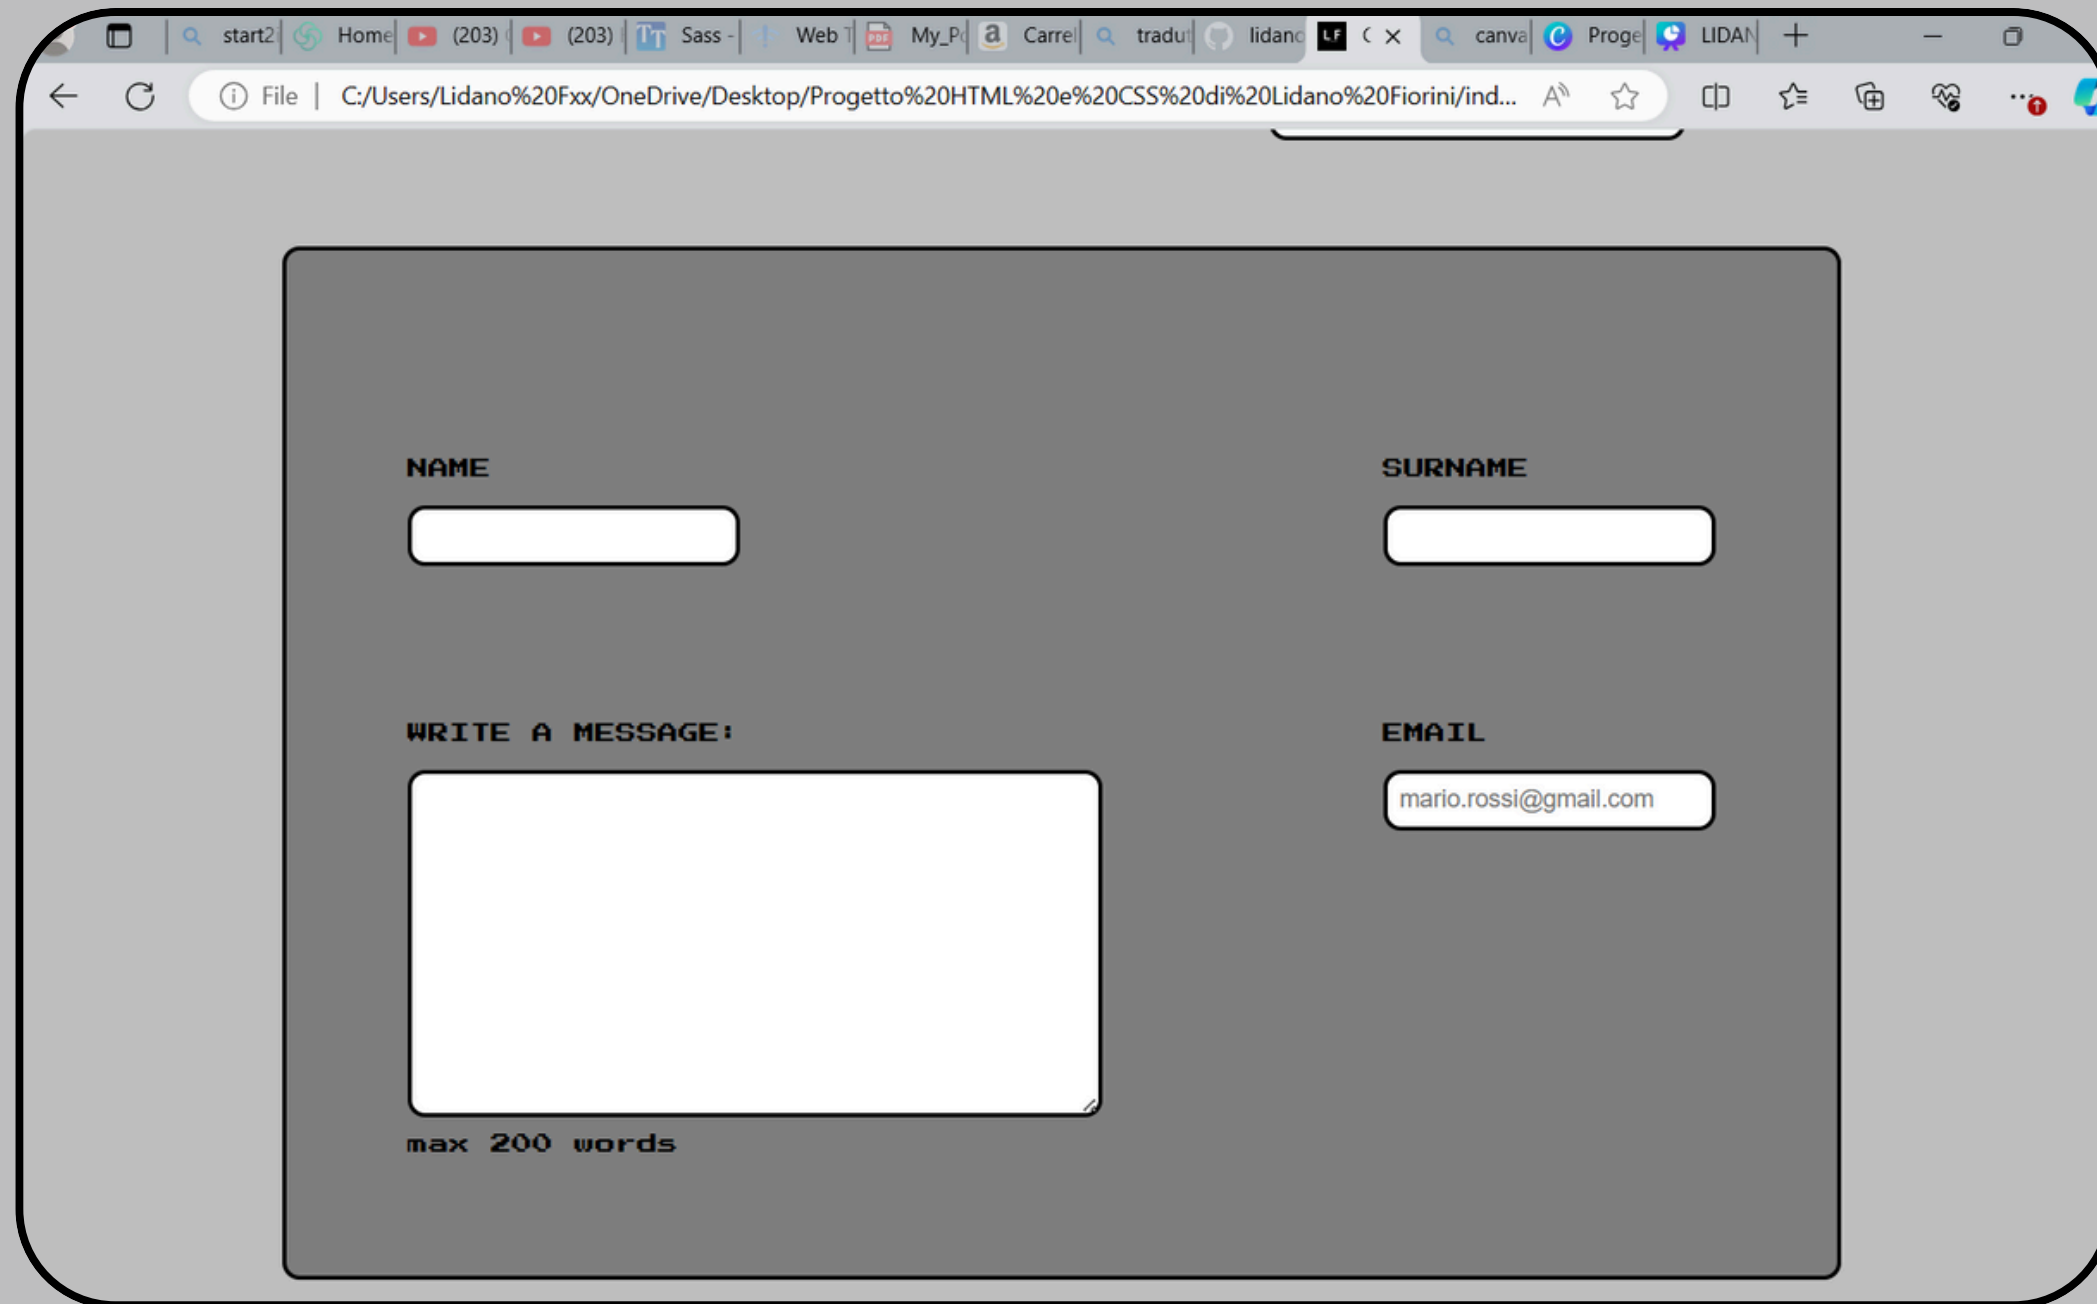

In this way my portfolio is divided into several html and css pages, this in my opinion has made it slightly more complicated to create but in the future when I start updating it it will be easier to edit the individual screens

These are 2 buttons link to my curriculum vitae and my github

On this third page called "project" I have inserted the words "work in progress..." Because being the first project I couldn't add anything

A screenshot of a web browser displaying a contact form. The browser's address bar shows the file path: `C:/Users/Lidano%20Fxx/OneDrive/Desktop/Progetto%20HTML%20e%20CSS%20di%20Lidano%20Fiorini/ind...`. The form is set against a dark gray background and includes the following fields:

- NAME**: A text input field.
- SURNAME**: A text input field.
- WRITE A MESSAGE:**: A large text area for writing a message, with a note at the bottom left stating "max 200 words".
- EMAIL**: A text input field containing the email address "mario.rossi@gmail.com".

This is the last page dedicated to the form where users can enter their personal data and contact me, this form is also easy to use like my entire website.

Finally, in the "social" section there is a drop-down menu that is not visible until you hover over it with the mouse pointer, from here the icons of the social networks that access my profile will come out, so just click on it and the link opens

Thank you for reading this
presentation, I leave you the
link to my github below
